

A laminated packaging film designed specifically for suppositories. It can withstand high-temperature filling, and is peelable, sealable and printable. Suppose™ ensures tight sealing, yet is easy to open.

#### Key features

- / PVC / PE and PVC / PVdC / PE options offer protection against moisture and oxygen
- / Alu / PE variants are suitable for formulations that need high-barrier protection
- / Available in translucent, white and opaque colours
- / Runs smoothly on all types of suppository packaging machines
- / Printing options are available
