

ACGcaps™ HL

A vegetarian capsule for liquid filling.

ACGcaps™ HL is a superior and cost-effective capsule for liquid contents. We've designed it to accommodate an expansive range of ingredients within liquid, and to open up fresh opportunities for innovation – especially for poorly soluble drugs, or natural active ingredients known to pose formulation challenges.

Key features

- / Ideal for liquids, semi-solids, pastes, hot-melts and gels
- / Can also hold tablets, pellets, capsules (or combinations thereof) in liquid
- / Secure and tamper-proof band sealing with colours to enhance product stand-out
- / Addresses the bioavailability challenges of poorly water-soluble drugs (such as BCS Class II and IV compounds)
- / Helps resolve the formulation challenges of low-dose and poorly water-soluble drugs, and natural ingredients
- / Liquid-filling reduces the cross-contamination risks associated with powder filling (as in the case of highly potent APIs)
- / Suitable for use with hot-melt liquids up to 70°C

Suitability
