

ACGcaps™ HX

Our delayed release vegetarian capsule.

Designed for delayed release applications, ACGcaps™ HX capsules have a unique coating that protects ingredients from gastric acid. This ensures targeted delivery in the desired intestinal region for optimal efficacy and bioavailability.

Key features

- / Delayed release with a proven and guaranteed disintegration time of no less than 30 minutes¹
- / Customised release profiles can be created to deliver active ingredients at precise times or specific locations within the gastrointestinal tract
- / Reduces risk of acid reflux or irritation to the gastric mucosa
- / Suitable for acid-sensitive ingredients such as enzymes, prebiotics, and probiotics
- / Ideal for heat-sensitive active ingredients that can degrade during coating
- / Accelerates product development, and saves on additional coating processes and costs

¹ Disintegration test performed as per ACG's in-house protocol

Suitability
