

CR / SF foil

Our CR / SF lidding foils are especially designed for creating child-resistant and senior-friendly blister packs. They have excellent safety credentials – preventing children from opening blisters too easily, while also ensuring convenience and user-friendliness for the elderly.

Key features

- / Wide-ranging structures to meet international requirements
- / Unique child-resistant lidding mechanism
- / Straightforward for seniors to use
- / High protection for individual doses
- / Can be applied in peelable, peel-push, cut-open and push-through foil applications.
- / Customised surface and reverse-printing options
