

Tropical foil

Aluminum-based laminates for tropical blister applications.

ACG's Tropical blister foils are aluminium-based laminates for tropical blister applications. They provide enhanced protection for thermoformed blister packaging, with an impermeable barrier protecting even the most sensitive products. ACG's Tropical foil is suitable for all kinds of medicines, and ensure extended shelf life.

Key features

- / High barrier against moisture, light and gases
- / Compact when compared to cold-form blisters
- / Superior aesthetics

Technical specifications

Structures
oPa
Alu
HSL

oPA: 25µm
Alu: 45µ or 50µm
HSL: 7gsm or 10gsm
