3 CONSERVE 360®

# CONSERVE 360®

CONSERVE 360® is an advanced, eco-friendly, and cGMP-compliant automated cleaning system designed specifically for Intermediate Bulk Containers (IBCs). This state-of-the-art solution delivers validated, repeatable cleaning results while eliminating the need for manual intervention.

Cleaning operations are fully recipe-based, allowing pre-programmed wash sequences. An optional conductivity sensor in the drain line provides online validation of cleaning efficacy.

CONSERVE 360® features a crevice-free stainless steel design with zero exposed fasteners, and a double-walled self-cleaning structure to ensure hygienic integrity.

Find this information on our website:  
Machinery > Washing > CONSERVE 360

Features	Benefits
A crevice-free construction with zero fastener connections and a double-walled design with self-cleaning mechanism	cGMP-compliant design
High-pressure jet technology with specially designed nozzles capable of operating at up to 70 bar	Facilitates effective washing ensuring thorough removal of even the most stubborn residues Prevents chances of cross-contamination from previous batches
Specially designed cleanable pump	Provides flexibility in maintaining water-line pressure and flow rate as required
User-defined recipe-based cleaning with pre-programmed wash cycles	Fully automated, needs no manual intervention and guarantees excellent repeatable results
Designed to reduce water consumption by up to 60%	Saves time, and reduces ecological footprint and total cost of ownership
Integration with online conductivity measuring system to help monitor and record every washing cycle	Helps establish better control over the washing process and supports hassle-free documentation for GMP audits
Supports 21 CFR Part 11 compliance	Enables secure electronic record keeping, audit trails, and the reviewing of historical cleaning data

# Aftermarket. Not afterthought.

At ACG, we understand that when you get a new piece of factory equipment, you're buying far more than a machine; you're also investing in a relationship that will last its lifetime.

That's why we take our aftermarket service so seriously.

Whether you need advice or training, are preparing to make your factories 'smarter', or simply need a machine fixed fast, know that ACG will always go above and beyond to offer excellent service and value. As far as we're concerned, we're in this together – for life.

# Let's talk.

Get in touch to find out more about our range of products and services. If you have specific equipment needs, we can even collaborate on delivering a purpose-made solution. We look forward to chatting.
