

PRESS RELEASE

ACG introduces a range of innovative new products for the Pharma industry

Entire display slants towards a futuristic view of the industry

ACG group, the world's leading supplier of capsules and engineering products for the pharma and nutra industry participates at P-MEC, one of the largest pharma machinery exhibitions in the world.

ACG's theme for this year's exhibition is "ACG Future World" due to the showcasing of a wide range of new products and the range of futuristic activities available on the booth.

Product being seen for the first time at the show include:

New Capsules – a new range of HPMC capsules in various formats and the highlighting of combination filled, multi-ingredient capsules.

New Films & Foils – ACG have recently invested in high speed, aluminum foil laminator, which has resulted in a new range of foil based products being introduced by the company.

New Engineering products – including GT X.ONE granulation train, Protab 700 high speed, Bi-layer tablet press, Accura 200, High capacity capsule check weighing system, Blister X for high speed blister packaging and Karton X a high speed cartoning machine.

New from ACG Inspection – increasing the range of solutions for the global track & trace market under the VeriShield name, introducing the CS15 tamper evident system and the BA23 bottle serialization system.

Commented Peter Neve, Chief Marketing Officer at ACG, “ACG has always been a pioneer in providing innovative solutions. At P-MEC this year we are launching the largest number of new products that we have ever introduced at one time. It is all part of our strategy to offer everything needed for Capsule and Tablet solid dosage manufacture. We are the company to watch both in India and globally.

Forming part of the booth’s exhibit is a 360⁰ virtual reality ride which takes visitors through an interactive experience of tablet manufacturing. There are also 3 Virtual Reality zones that are designed to give visitors a first-hand experience of the GT X.ONE granulation train in operation.

The main objective is to offer visitors at P-MEC a user experience which goes beyond simple touch and feel and which is immersive, making them part of the product experience.

About ACG

The ACG group is the only supplier in the world offering integrated manufacturing solutions for the pharmaceutical industry. The company’s diverse product range of Capsules, Films & Foils, Engineering and Inspection systems don’t just meet, but exceeds the demands of international regulatory requirements. ACG is committed to just one goal: to offer everything needed for efficient capsule and tablet manufacturing.

ACG has over 5 decades of experience and is present in over 100 countries, with over 4,500 employees around the world. Our customer-centric approach has won us many loyal, satisfied customers and partners by nurturing relationships with dignity and transparency.
